

# DENTIGRAM

## Patient Communications

Reach your patients with advanced communication tools and never miss an opportunity to engage with them.

## Why Choose Dentigram?

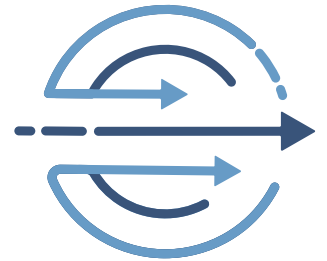

### SMART

Set it and forget it with Dentigram's extensive library of blueprints. Automated rules-based patient communications gives your staff more time to focus on patients in the office.

### PURPOSE-BUILT

Dentigram was built exclusively for Denticon, providing a tighter integration than third-party solutions. No need to log into a separate program to manage your patient outreach — do it all within Denticon.

### ECONOMICAL

Dentigram is cost-effective and has the same functionality as most of the third-party patient communication solutions available.
